

Volker Staudt, PhD (M'93-SM'04, VDE) was born in Bochum, Germany, in 1962. He studied electrical engineering at the Ruhr University Bochum, Germany, receiving his Dipl.-Ing. degree in 1987 and his Dr.-Ing. degree in 1993. He successfully finished his Habilitation in 2000 at the Department of Electrical Engineering and Information Sciences of Ruhr-University Bochum, where he currently is adjunct professor.

His current research interests include theory and control of inverter-fed machines, control of grid-connected converters, power definitions, power quality and compensation strategies as well as high-voltage dc transmission systems based on modular multilevel converters.
